Subject: Angered consumer

TWIMC:

Identity theft is pervasive and must be stopped. Please strengthen the laws to require that all enterprises that collect consumer data 1) have solid systems in place to protect that data (e.g. encryption, trusted computing, etc...) and 2) should a breach occur, they are held accountable for damages of said breach - not just a credit monitoring service. This single remedial offer is an insult to our intelligence.

Very Sincerely,

[redacted]

Lompoc, CA
